

THE MAGIC OCEAN SLIDE

DID YOU KNOW...?

Oceans cover more than 70% of the Earth's surface.

An incredible 94% of all living species exist in the ocean.

Around 70% of the oxygen we breathe is produced by the ocean.

On average, eight million tonnes of plastic end up in our oceans every year, either as larger, recognisable items such as plastic bags and fishing nets, or microplastics, which are tiny pieces of plastic smaller than your fingernail.

Around 90% of sea birds and fish are believed to have plastic particles in their stomachs.

The UN estimates plastic is killing around one million seabirds and 100,000 sea creatures every year.

Do you know any other facts about the ocean?

THE MAGIC OCEAN SLIDE

People are not going to stop making or using plastic. It is cheap to produce and hardwearing, which makes it useful. But there are things we can all do to reduce the amount of plastic pollution:

💧 Practise the three “Rs” – reduce the amount of plastic you use, reuse plastic when you can and recycle as much of your plastic as possible.

💧 Drink water from reusable bottles.

💧 Reuse carrier bags when you go shopping.

💧 Join, or start, a plastic clean-up group. If you live near the seaside, there are “beach clean-up days” you could get involved with.

💧 Educate yourselves on what can and can't be recycled in your area, learn about the problems with plastic pollution and talk about it with friends and family.

What else could you do to help stop plastic pollution?

THE MAGIC OCEAN SLIDE

The ocean is in trouble and it's time for a clear-up mission!
Can you design something that can get rid of all the plastic?
What features does it have? What is it made of?
Can you think of a name? Draw your design below.

PLAN YOUR OWN PLAYDATE ADVENTURE!

WHERE WOULD YOU LIKE TO GO?

HOW WOULD YOU GET THERE?

WHAT EXCITING OR CHALLENGING THINGS MIGHT HAPPEN THERE?

WHAT WOULD YOU LEARN?

WHAT MESSAGE WOULD YOU BRING HOME WITH YOU?

BUILD YOUR OWN ROCKET!

Design your own rocket to take you to the Wishing Star.
What special features does it have? What colour should it be? What is it made of? Draw your rocket below, and then why not try building it out of recycled material, like Katy, Zia and Cassie did?

HERE'S A PHOTO OF A RECYCLED
ROCKET THAT THE
AUTHOR MADE!

SEND US YOUR PHOTOS EITHER OVER EMAIL TO MARKETING@ONEWORLD-PUBLICATIONS.COM
OR OVER TWITTER @ROCKTHEBOATNEWS

There are a number of things we can all do to try to help combat climate change:

Walk, cycle or scoot to your destination rather than going by car.

Use less power at home. Remember to switch lights off when you leave a room and turn off your television rather than leaving it on standby.

Reuse and recycle as much as you can.

Talk to people about the dangers of climate change, start a petition, write to your local governing body and encourage them to push for regulations that will support our planet.

Plant more trees.
